EDUCATION

University of Redlands - 3-2 Engineering Program

B.S. Mechanical Engineering, B.A. Data Science, Class of 2027 | GPA: 3.3

Organizations: Students for the Exploration and Development of Space (Vice President), Robots, Drones, and AI Club (Vice President), Rotaract Club (Vice President), Boy Scouts of America (Eagle Scout), Redlands Tennis Club (President)

WORK EXPERIENCE

NASA L'SPACE Mission Concept Academy

Tempe, AZ (Remote)

Mechanical Engineer, Outreach Officer

Jan. 2025 – May. 2025

- Analyzed simulation outputs to optimize design decisions for propulsion and power systems
- Collaborated with a multidisciplinary team to develop and submit a Preliminary Design Review
- Designing and integrating spacecraft subsystems using Siemens NX for CAD modeling
- Contributor to project management, systems engineering, and science-objective alignment

Fortune Metal Group Inc.

Santa Fe Springs, CA

Manufacturing Engineer Intern

Jun. 2024 – Aug. 2024

- Developed process flows for end of life electronic components leading to a 15% efficiency increase
- Helped host bi-monthly kaizen events to increase employee efficiency, increasing speed by 20%
- Worked with suppliers in optimizing product parameters and led resulting changing internal processes
- Utilized lean manufacturing principles by implementing a double bin system to improve material flow.

Orange County Riptide

Orange County, CA (Hybrid)

Marketing and Public Relations Intern

Feb. 2024 – Jun. 2024

- Engaged communities through the creation and advertisement of theme nights and outreach efforts
- Used spreadsheet analytics and basic statistical modeling to evaluate campaign reach and engagement
- Collaborated with the marketing and operations team to translate data findings into actionable strategies

PROJECT EXPERIENCE

S.E.D.S.

Redlands, CA

Space Rover, Mechanical Engineering Team

Jan. 2024 - Present

- Modeled chassis and drivetrain components in SolidWorks to support rover mobility design.
- Researched potential design, stress and environmental requirements that the rover would withstand.
- Coordinated vendor quotes, comparing pricing and materials to identify the most cost-efficient strategy

Robotics, Drones, and AI Club

Redlands, CA

FPV Drone

Jan. 2026 - Present

- Designed and assembled 3D printed FPV drone frames, focusing on motor configuration
- Built CAD models and selected components to optimize weight distribution and flight stability
- Prototyped and tested various configurations, tuning ESC settings to improve flight performance

PROFICIENT SKILLS

Software - Fusion360, Solidworks, Python, Siemens NX, MATLAB, GD&T, Revit

Languages: English (fluent), Cantonese (conversational), Mandarin (conversational), Russian (Beginner)

Interests: Social Media, Basketball, Tennis, Gym, Hiking, Running, Cooking, Backpacking
